

## SUBSEA SUPPORT VESSEL

# Maersk Implementer

Maersk Implementer is designed together with Marin Teknikk, and is built as a flexible, stable and reliable platform to carry out a wide range of deep and shallow water operations in challenging offshore environments. With a very energy efficient propulsion set-up, this DP 3 vessel features a 400 t active heave compensated crane and 2 work class ROVs capable of operating in up to 3,000 m water depth. The large 1,850 m<sup>2</sup> free deck is uniquely designed with hundreds of non-welding, sea fastening features, and cofferdams are built in above all tanks to ensure efficiency and flexibility for client operations. The accommodation features 111 modern single cabins and 9 double cabins to meet increased comfort level requirements.

### Key features:
